# Going Pro - Moving from ArcMap to ArcGIS Pro

*ArcGIS Version: Pro 2.x*

## Overview

This workshop will allow ArcGIS® professionals to get familiar with ArcGIS Pro. A perfect quick introduction, participants will leave this class with an understanding of the new ArcGIS Desktop interface, the new Project structure, how to work with layers in ArcGIS Pro and the basics of symbology and layouts.

## Audience

People familiar with ArcGIS Desktop who want to start using ArcGIS Pro.

## Topics Covered

- ArcGIS Pro Overview – Get familiar with the basics of navigating and adding data to a Pro project. (What is ArcGIS Pro?; Getting Started; ArcGIS Online/Portal Integration )
- Working with Maps and Layers – Starting a new project, setting symbology and layer properties, creating labels (Creating a Project; Working with Layers: Symbology, Labels)
- Working with Data – Using attributes and locations to select features and answer questions, creating new data, modifying existing data (Selections and Analysis; Creating and Editing Data)
- Presenting your Data – Working with 3D data using scenes, creating layouts to print or export (Scenes in Pro; 3D Data and Layers; Layouts)

## Format

In-person instruction with hands-on practice, and course materials you can keep.

## Prerequisites and Recommendations

Attendees should have knowledge of Microsoft Windows® and have a comfortable working knowledge of the use of ArcGIS Desktop, including the topics covered in the **Fundamentals of ArcGIS** class.
